

Aman Verma, PMP® CSPO®

Program Lead | Project & Product Leadership | Mobile & IOT

Greater Noida, India 201310 | aman.verma1796@gmail.com | +91 8004668544 | linkedin | github

Summary

Program Lead with over 9.5+ years of experience driving the end-to-end delivery of global software projects and mobile OS products. Adept at bridging the gap between cross-functional technical teams and business stakeholders to gather requirements, orchestrate product life cycles, and execute successful market launches across South Asia. Skilled in leveraging Agile methodologies and business analysis principles to optimize resources, manage large-scale beta ecosystems of 1000+ participants, and lead high-performing teams. Proven track record of increasing team productivity by 40% while ensuring the on-time, in-scope delivery of high-quality, user-centric technology solutions.

Area of Expertise

Business & Strategy: Program & Project Management, Strategic Partnerships, B2B Stakeholder Management, Market Research & Benchmarking, Cross-functional Leadership.

Technical & Data:: Python, SQL ,Generative AI & LLMs, IoT Integration, Connectivity Technologies, Mobile Ecosystems, LLM - AI Quality.

Tools: Jira, Microsoft Project, Power BI.

Methodologies: Agile Methodologies, Project Management (PMP), Product Management (CSPO).

Experience

Project Lead, vivo India, Greater Noida

July 2018 – Present

- Spearheaded joint projects with top Indian IoT OEMs and major financial institutions, demonstrating strong B2B relationship building and techno-commercial engagement.
- Led market research, competitive benchmarking, and successful product launches across five major South Asian markets
- Collaborated tightly with global cross-functional teams (R&D, Marketing, Operations) to gather requirements, influence product roadmaps, and ensure alignment with market needs.
- Successfully integrated Generative AI New features into product lines vivo, showcasing an understanding of next-generation digital experiences.
- Applied PMP methodologies to manage resources, evaluate technology alternatives, and ensure on-time project delivery within a complex, matrixed organisation.

Project's - vivo

vivo/iQOO Market Readiness & Ecosystem Program

07/2018 - Ongoing

- Spearheaded Go-to-Market (GTM) readiness initiatives for vivo and iQOO in India, bridging the gap between global R&D and regional market expectations.
- Cultivated and managed an ecosystem of over 1000+ external stakeholders, implementing structured communication channels to gather actionable product insights and influence the development roadmap.
- Drove strategic product improvements that reduced post-launch market escalations by 40%, significantly enhancing brand reputation and customer satisfaction.

South Asia Connectivity & IoT Integration Initiative

07/2020 - 07/2025

- Led the regional telecommunication and localization strategy for mobile devices across five South Asian markets, ensuring seamless performance on complex regional networks (4G/5G).
- Orchestrated the integration and commercial readiness of the broader IoT ecosystem, including wearables, third-party applications, and secure banking platforms.
- Collaborated with cross-functional global teams to validate network compatibility.

OTA Lifecycle & Product Quality Management

07/2020 - Ongoing

- Managed the software lifecycle and pre-OTA deployment validation for critical device modules, including Network Adapters, Power Management, and System Performance.
- Facilitated techno-commercial interactions between regional market teams and global developers to promptly resolve critical field issues and drive continuous product improvement.

QA Analyst, Xiaomi – Gurugram,HR

Dec 2017 – June 2018

- Collaborated directly with engineering and development teams to troubleshoot critical path issues and shorten product release cycles.
- Managed cross-platform technical environments to support the seamless deployment of default mobile applications.

QA Analyst, Samsung India, Greater Noida ,UP

Dec 2016 – Nov 2017

- Assisted in transitioning to **Agile development**, shortening release cycles by 3 weeks.
- Support test environments for **15+ default mobile applications**, supporting seamless deployment and QA.

Education

Master of Computer Application (AI / ML)

2022 - 2024

Amity University, 82%

Master of Business Administration

2020 - 2022

NMIMS Deemed-to-be-University, 72%

Bachelor of Science

2013 - 2016

Bundelkhand University, UP , 62%

Certifications

Project Management Professional (PMP)®

Aug 2024 credly link

Project Management Institute.

Certified Scrum Product Owner (CSPO)®

March 2025 CERTIFIED BADGE

Scrum Alliance.

Career Essentials in Business Analysis

Dec 2023 Credential

Microsoft and LinkedIn.

Internal Certified Trainer for Project

2024-2025

vivo india mobile.

Key Achievements

AI Integration & Next-Gen Digital Experiences

Led the successful commercial integration of advanced Artificial Intelligence features (AI Note Assist, AI Transcript Assist, AI Erase & Color Adjustment and AI Global Translation) into the flagship Funtouch OS for premium device series. This highlights expertise in deploying consumer-facing AI technologies that parallel the connected, intelligent experiences required for modern Automotive Digital Cockpits.

Semiconductor-Level Security & Techno-Commercial Strategy

Spearheaded a critical market intelligence initiative by investigating local supply chains to identify hardware-level vulnerabilities. Collaborated directly with global R&D to develop and deploy an MTK chipset-level security patch across a portfolio of 120+ commercial products, demonstrating strong techno-commercial problem-solving and an understanding of semiconductor ecosystems.
